PROFESSIONAL SUMMARY

Analytics professional transitioning from hospitality operations into data analysis, with 9 years of experience in KPI monitoring, reporting and decision support. Postgraduate in Data Analysis for Business (19/20) and ongoing Computer Engineering studies. Skilled in SQL, Python, Power BI, Excel and DAX, with hands-on projects in business intelligence, dashboard development, forecasting and automated data analysis. Brings a practical business perspective to data work, understanding what the numbers mean operationally as well as analytically.

TECHNICAL SKILLS

Languages & Tools: SQL, Python, DAX, Git, GitHub

BI & Visualisation: Power BI, Excel, matplotlib, seaborn

Libraries: pandas, NumPy, scikit-learn, statsmodels, Streamlit

Skills: Exploratory Data Analysis, Statistical Analysis & Hypothesis Testing, Data Modelling, Dashboard Development, Data Cleaning, Forecasting, Data Transformation, Reporting

DATA ANALYTICS PROJECTS

Hotel Booking Analytics Dashboard | SQL, Power BI, DAX [Repository](#)

- Designed and developed a multi-page Power BI dashboard covering booking performance, cancellation analysis, revenue trends and guest segmentation
- Prepared and validated booking data in SQL, creating calculated fields such as total nights, total guests and estimated revenue
- Built a star schema data model in Power BI with a central FactBookings table and 10 dimension tables
- Created 35+ DAX measures for KPIs including cancellation rate, ADR, revenue and year-over-year time intelligence
- Surfaced actionable insights such as a 42% cancellation rate for City Hotels vs 28% for Resort Hotels, informing recommendations on cancellation risk, direct booking growth and seasonal pricing

M.A.I.A. — Automated Data Analysis App | Python, Streamlit, pandas [Repository](#) [Live demo](#)

- Built and deployed a Streamlit web application enabling interactive exploratory data analysis of CSV and Excel files
- Automated data profiling, quality checks, visualisation generation and business-oriented insight summaries
- Developed automatic data type detection and a chart recommendation engine

Retail Sales Forecasting | Python, Time Series Analysis, pandas [Repository](#)

- Group project comparing baseline, statistical, machine learning and deep learning models (SARIMAX, Prophet, XGBoost, LSTM, ensemble) for 30-day retail demand forecasting; responsible for data preparation, exploratory analysis and business interpretation of results
- Evaluated models using MAE, RMSE and WMAE, weighting forecast errors by business-critical periods such as weekends, and translated results into demand planning and inventory insights
- Identified seasonal sales patterns and recurring demand peaks with direct implications for inventory and commercial strategy

PROFESSIONAL EXPERIENCE

Front Office Manager — Axis Verman

2018 – Present

- Tracked and reported operational KPIs — occupancy rate, ADR, cancellation rate and guest satisfaction — supporting weekly pricing and management decisions

- Led, scheduled and trained the front office team, coordinating daily operations with housekeeping, maintenance and senior management
- Identified seasonal demand patterns and booking lead-time trends, contributing to pricing adjustments during peak periods
- Investigated declining guest-review scores by categorising 3 months of Booking.com review data, identifying infrastructure and breakfast quality as the root cause rather than staff performance — insights that redirected improvement priorities and contributed to a score recovery from 7.9 to 8.3
- Supported revenue and inventory management through ongoing booking analysis and operational reporting

Marketing (concurrent role) — Axis Hotéis

2023 – 2025

- Analysed digital marketing campaign performance using key metrics and reporting data
- Monitored campaign results to identify improvement opportunities and support optimisation decisions
- Collaborated with stakeholders to align campaign execution with business goals

Front Office — Axis Vemar

2017 – 2018

- Managed reservations, check-in/out processes and customer service in a high-volume hospitality environment

EDUCATION

Postgraduate Program in Data Analysis for Business — Grade: 19/20

2025 – 2026

Polytechnic University of Cávado and Ave (IPCA)

Bachelor's Degree in Computer Engineering (expected 2027)

2024 – Present

Universidade Aberta

Bachelor's Degree in Tourism Management

2014 – 2017

Polytechnic University of Cávado and Ave (IPCA)

CERTIFICATIONS

- Generative AI for Business Intelligence (BI) Analysts Specialization — IBM
- Google Data Analytics Professional Certificate
- Data Analysis with Python — IBM
- Python for Data Science — IBM
- SQL for Data Science — UC Davis
- Data Analysis with Power BI — IPCA
